HIPAA Security Rule Compliance Audit

Repository: bobguard

Pull Request: #1

Branch: phase-2b-routes

Commit: 439ece9

Author: BobGuard Demo

Audit Date: 2026-05-02

Status: BLOCKED

Forward-Compatible with 2024 HIPAA Security Rule NPRM

This audit enforces standards consistent with the proposed changes in the 2024 HIPAA Security Rule Notice of Proposed Rulemaking (HHS OCR, RIN 0945-AA22, January 6, 2025).

Executive Summary

[watsonx.ai unavailable — placeholder]

Control Mapping

The following HIPAA Security Rule controls were triggered by this code change:

Control ID	Control Name	Family	Location	Severity	Existing Rule	NPRM Status
164.312(a)(2)(iv)	Encryption and Decryption (Addressable)	Technical Safeguards	src/prisma/schema.prisma:26	**block**	addressable	would_become_required
164.312(b)	Audit Controls	Technical Safeguards	src/routes/patient.routes.ts:31	**block**	required	remains_required_with_clarification
164.312(d)	Person or Entity Authentication	Technical Safeguards	src/middleware/auth.middleware.ts:43	**block**	required	would_explicitly_require_MFA
164.312(e)(1)	Transmission Security	Technical Safeguards	src/routes/message.routes.ts:31	**block**	required	remains_required_with_clarification
164.312(c)(1)	Integrity	Technical Safeguards	src/routes/patient.routes.ts:204	**warn**	required	remains_required

Test Evidence

Automated test results demonstrating compliance verification:

```
{
  "total_tests": 12,
  "passed": 0,
  "failed": 12,
  "critical_failures": 4,
  "high_failures": 7,
  "medium_failures": 1,
  "compliance_status": "NON-COMPLIANT"
}
```

NPRM Forward-Compatibility Analysis

Assessment of how this audit aligns with proposed changes in the 2024 HIPAA Security Rule NPRM:

Two controls are affected by the 2024 HIPAA Security Rule NPRM: (1) §164.312(a)(2)(iv) would move from addressable to required - BobGuard already enforces encryption as required. (2) §164.312(d) would add explicit MFA requirement - BobGuard already flags single-factor auth as blocking. The NPRM proposes to remove the addressable/required distinction for most specifications. BobGuard's enforcement aligns with the proposed stricter standards.

164.312(a)(2)(iv): Encryption and Decryption (Addressable)

Existing Status: addressable

NPRM Proposal: would_become_required

BobGuard Action: Already enforces the stricter proposed standard.

164.312(b): Audit Controls

Existing Status: required

NPRM Proposal: remains_required_with_clarification

BobGuard Action: Already enforces the stricter proposed standard.

164.312(d): Person or Entity Authentication

Existing Status: required

NPRM Proposal: would_explicitly_require_MFA

BobGuard Action: Already enforces the stricter proposed standard.

164.312(e)(1): Transmission Security

Existing Status: required

NPRM Proposal: remains_required_with_clarification

BobGuard Action: Already enforces the stricter proposed standard.

164.312(c)(1): Integrity

Existing Status: required

NPRM Proposal: remains_required

BobGuard Action: Already enforces the stricter proposed standard.

Digital Audit Trail

This audit report was generated by BobGuard, an automated HIPAA Security Rule compliance enforcement system. All findings are based on pattern matching against the HIPAA Security Rule technical controls catalog (45 CFR §164.308, §164.310, §164.312) and forward-compatible with the 2024 NPRM proposed changes.
